

ENTER TIME & JOB DATA REMOTELY

Send timecard data from remote job locations to the office with FOUNDATION mobile. This web-based application makes it easy to enter, edit, and submit timecard information from the field. Better yet, FOUNDATION mobile runs on devices that you already know and use, like smartphones (iPhone®, Droid®, Blackberry®, etc.), iPads®, tablets, netbooks, and ruggedized laptops.

Working at an extremely remote job site outside of your device's service area? No problem! FOUNDATION mobile features offline capabilities. Your field staff can continue to enter and save data that will sync to the office once they are back within the service area.

Advantages of FOUNDATION mobile Remote Timecard Entry

- For use with FOUNDATION® for Windows®
- Streamline data flow between field and office
- Offline capabilities for locations without Internet
- Intuitive, easy-to-use entry screens for operating ease
- Compatible with common handheld devices
- Applications for remote timecard entry, equipment entry, and more
