

Below are the hardware requirements for an on-premise installation of FOUNDATION® construction accounting software. FOUNDATION is compatible with Microsoft® Windows® (32-bit and 64-bit).

INSTALLATION PREREQUISITES

MINIMUM:

- ❑ Microsoft SQL Server® 2012
- ❑ Microsoft Windows Server® 2012
- ❑ Microsoft Windows 7 Professional or higher
- ❑ Microsoft Office® 2013 32-bit edition *if using Outlook® Plugin, Outlook Integration or Excel® queries (optional)*

RECOMMENDED :

- ❑ Microsoft Windows Server 2016
- ❑ Microsoft Windows 10 Pro or higher
- ❑ Microsoft Office 2016 32-bit edition *if using Outlook Plugin, Outlook Integration or Excel queries (optional)*
- ❑ Microsoft SQL Server 2016

SERVER REQUIREMENTS

- 8GB of RAM and 500MB per user
- .NET Framework updates may be required for SQL Server (*download available from Microsoft.com*)
- Windows Server compatible with the Microsoft SQL Server edition of your choice:
 - SQL Server Express Edition ** NOTE: *This edition is FREE but should only be used with 10 or fewer FOUNDATION users.* **
 - SQL Server Standard Edition
 - SQL Server Enterprise Edition
 - SQL Server Business Intelligence Edition

Please consult your IT professional to assist in deciding which edition is right for you.

- Additional installation requirements:
 - A named instance of FOUNDATION
 - Mix mode authentication enabled
 - SQL Server Management Studio installed

WORKSTATION REQUIREMENTS

- 4GB of RAM
- Microsoft Windows 7 Professional or higher — either 32-bit or 64-bit systems
- Microsoft Office is optional, unless planning to utilize Outlook Integration or importing/exporting with Excel
