Below are the system requirements for **FOUNDATION® HOSTED** construction accounting software. FOUNDATION Hosted is compatible with Microsoft® Windows® (32-bit and 64-bit).

RECOMMENDED DEVICES

A laptop or desktop running one of these supported operating systems:

☐ Microsoft Windows 10 (or newer) Pro or Enterprise

☐ OS X® 10.9 or later

* Foundation Software does not support the configuration or compatibility

of tablets, smartphones, and other devices with FOUNDATION Hosted.

SOFTWARE FOR DEVICES

FOUNDATION Hosted requires an AppController to be installed on your device to access the environment.

INTERNET RECOMMENDATIONS

FOUNDATION Hosted requires a broadband Internet connection of at least 3 Mbps down and 1 Mbps up per user.

ADDITIONAL SPECIFICATIONS

- Microsoft Office® 2016 32-bit edition if using Outlook Plugin (optional.)
- FOUNDATION Hosted is compatible with laser printers only.
- Please contact Foundation Software before converting to FOUNDATION Hosted if you use any third-party applications to query data from the FOUNDATION database.
- A VPN may be needed when accessing FOUNDATION outside of the United States. Check with Technical Support prior to traveling out of the country.
- Only Microsoft Authenticator and Google Authenticator are supported for multifactor app verification.
- Only phone numbers based in United States, Canada, Mexico, Puerto Rico, Virgin Islands, and Bahamas are supported for multifactor text verification. Standard text rates apply.

Note: We recommend that your IT professional be present during the conversion to FOUNDATION Hosted.

Note: We follow Microsoft's support and compatibility matrix.
